

# Ingersoll I SWEEP<sup>®</sup> will outswEEP any other sweeper made.

---

Sweep width	38" (96 cm)
Width overall	45" (116 cm)
Height overall	35" (89 cm)
Height adjustment	Single lever, seven positions
Length overall	71" (180cm)
Wheels	Cast aluminum, Vulcanized Rubber tires 3"x13" (7.5cm x 32cm)
Hopper Capacity	12 Bushels (422 lt), all steel, pivots for easy discharge.
Brush assembly	Dual action brushes, independently operated.
Weight	103 Lbs (47 kg)

INGERSOLL

**i** SWEEP®

works twice as hard;  
it's the only sweeper with  
the dual-speed, two-brush  
pickup system.

The exclusive Ingersoll *ISWEEP*® is a 38"-wide lawn sweeper unlike any other lawn sweeper. It utilizes two gear-driven polypropylene brushes in a unique system. The lower brush is driven at a moderate speed to pick up clippings, leaves and other debris. The second brush is placed above the pick-up brush and is driven at a much higher speed by gear

multiplication, propelling swept materials at a high velocity

12-bushel capacity hopper. Gear drive means no belts to stretch, slip or disengage.

Ingersoll's gear drive system also contains a unique and patented ratcheting device that allows the outside wheel to drive the brushes during a turn, so you never lose sweeper efficiency. No other sweeper uses this system. A height selector allows you to choose from six sweeping positions and includes a higher transport position. The 12-bushel hopper is extremely easy to empty, conveniently pivoting backwards over the wheels to dump behind the path of the sweeper and tractor. There is no need to unhitch *ISWEEP* from the tractor to empty it. So when it comes to sweeping large areas, no sweeper outsweeps Ingersoll *ISWEEP*.
